

GET PAID FASTER – SPEND LESS TIME MAKING THAT HAPPEN

Download a free toolkit from the American Medical Association (AMA) now to help your practice use electronic funds transfer (EFT)!

The advantages of adopting electronic processes are significant—the time spent doing so doesn't have to be. This [webinar](#) from the AMA, “**Make EFT and ERA work for you,**” and [its related toolkit](#), will provide the forms you need and take you step-by-step through the process. You'll soon benefit from:

- Faster payment
- Less staff time making manual check deposits or phone calls to payers
- No risk of lost or stolen checks
- Money saved—automatic reconciliation of claim payments costs much less than manual processing
- Automatic identification of overpayments and underpayments

Receiving claim payments electronically reduces overall health care costs—and that helps every practice. Download your toolkit now and spend more time with your patients than with paperwork.

Be sure to bookmark ama-assn.org/go/htc to access new updates as they become available.
