

## MA - HARVARD PILGRIM HEALTH CARE (HPHC)

### **RadMD Online Tool Update**

**Effective Date: July 1, 2012**

RadMD, the online tool for ordering advanced imaging services, now allows providers to upload clinical documentation, which may expedite the review process. RadMD is offered by National Imaging Associates (NIA), HPHC's radiology program administrator.

Providers may use RadMD to order non-emergency outpatient advanced imaging services and provides instant access to advance imaging authorization. Immediate approval is received for many studies and if additional clinical information is needed, the provider can quickly upload the necessary information.

RadMD users need a unique account. For more information on this program, visit [www.radmd.com](http://www.radmd.com).
