

HIGHMARK BCBS - PA

Update on Molecular Pathology Test Codes

Effective Date: April 1, 2012

Highmark has issued specific guidelines for non-facility providers to follow when billing molecular pathology test codes for Highmark's Commercial and Medicare Advantage members. For commercial members, providers should report the appropriate molecular pathology procedures test codes that are valid for the service dates beginning on or after January 1, 2012, and for Medicare Advantage members, follow the instructions published by CMS.

Effective April 1, 2012, 19 stacking codes (s codes) will be discontinued, and providers will need to report the new molecular CPT codes. See <https://www.highmark.com/health/news/bts-2-2012/index.html> for more information.
